Efficient, fast and safe

**Glued laminated timber
profiles
pipes
steel**

Our machines handle any long and heavy material.
We offer comfortable and safe handling of goods.

This is why BULMOR holds a worldwide leading position in
the strongest markets for heavy-duty and special-purpose
vehicles.

Home of strong sideloader brands

Established in 1879 as the Schöberl & Sons Engine- and Machine Factory, the company started to build front forklifts in the 1960s and later specialized on building JUMBO sideloaders in the 1980s.

By integrating technology and experience from the industry pioneers IRION, LANCER, and the German SHS, and with more than 45 years experience in forklift construction, BULMOR is able to offer tailored solutions based on a comprehensive range of sideloaders and multidirectional forklifts.

Engineering tradition since 1879

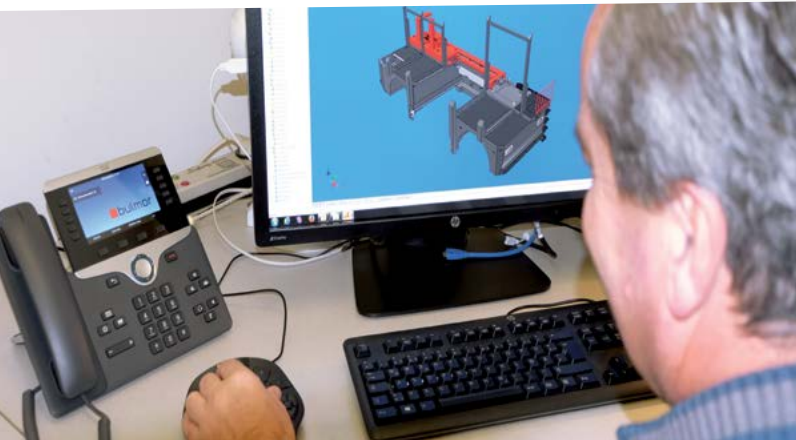

Production of individual customer solutions

Sheet metal processing
Welding shop
Machining shop
Assembly

Our machines reflect our commitment to quality, reliability and the Austrian tradition of innovation.

Mechanical engineering
Electrical engineering
Mechatronics
Hydraulics

Service . Spare Parts

Reduce downtime costs - After sales support by Bulmor.

Local service
Spare Part Hub
Technical support
Training center

Bulmor experts - available to you worldwide.

Bulmor benefits

Heavy duty chassis

For extreme durability and stability.

Safe Load Handling

Safe loading thanks to massive mast and chassis tilt cylinders.

Simple maintenance

service parts easily accessible

More comfort

thanks to ergonomic driver cabs.

Sideloader

- 8,500 to 11,000 lbs
- 13,000 to 17,500 lbs
- Heavy Line 22,000 to 39,500 lbs

Gas, diesel, electric

Designed for tough applications

robust steering axle design

The new **BMS Series**

...more robust
...faster
...even easier to service

Quick steering

thanks to multidirectional
steering with
12 steering programs

Compact design

Small outside dimensions

Optimum wheel load distribution and minimum wear when compared to fixed castors

Quadruple or double oscillating mounted load wheels

Robust design
Individually produced
Extreme longevity

Multidirectional Sideloader

- 6,500 to 7,500 lbs with articulated frame
- 4,500 to 15,000 lbs tons with single frame

Electric
